

# Nicholas Angelopoulos

## Software Engineer

954-798-6916 | neangelopoulos@gmail.com | Boulder, CO | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Highly skilled and adaptable Full-Stack Software Engineer with expertise in using the PERN stack. Proficient in both back-end architectures and front-end design frameworks, including React, Chakra UI, Tailwind CSS, and Bootstrap. Eager to explore new technologies and passionate about delivering innovative and visually appealing user interfaces.

## TECHNICAL SKILL

Languages: JavaScript, C#, SQL, HTML, CSS

Front-End: React, Next.js, Redux, Chakra UI, Tailwind CSS, Bootstrap, Phaser

Back-End: Node.js, Express, Firebase, .NET, PostgreSQL, Sequelize, Supabase

Testing: Jest, Mocha, Chai, Jasmine, Test Driven Development

APIs & Cloud Services: REST APIs, Google Cloud Vision, Axios, Heroku

Version Control: Git, Github

Methodologies: Agile, Scrum, Kanban

## EXPERIENCE

**Software Developer Contractor | Success Rocket | Remote** 07/2023 - Present

- Identify and resolve complex bugs in legacy-code applications, ensuring smooth, error-free software performance
- Develop scalable, responsive, and intuitive user interfaces using React, Bootstrap, and Redux
- Integrate APIs and cloud services with Axios and Firebase using Redux Thunks
- Collaborate with Github teams, project boards, and agile methodologies to organize workflow and prevent merge conflicts

**Software Engineer Contractor | Alta Lodge | Remote** 06/2023 - Present

- Design a streamlined xlsx upload form to Cloud Firestore database for optimized product pickup
- Develop algorithms to provide the best pathing to stores based on xlsx document uploads
- Implement a secure user login/signup portal with Firebase Authentication
- Create and implement unit tests using Jest to ensure the app operates flawlessly

**Software Engineer Contractor | IoT Web App | Remote** 09/2022-03/2023

- Redesigned an outdated jQuery front-end using React to enhance modularity and user-friendliness
- Provided consultation on the database model for IoT devices in a marine environment
- Implemented date/time processing based on IoT device location information in C#

**Manager, Reservations Dept. | Alta Lodge | Alta, UT** 09/2019 - 04/2022

- Led a sales team that achieved a record \$2 million in annual revenue
- Optimized room occupancy through successful utilization of RDP's tape chart system, resulting in over a 20% increase in occupancy rate year over year
- Oversaw a small office team, improved communication policies, and promoted better information sharing

## TECHNICAL PROJECT

**Portfolio Site | Sole Full Stack Engineer | 02/2023 | [NickyAngel.com](#) | [Github](#)**

- Created a visually appealing site showcasing front-end design skills and enhancing personal exposure
- Utilized Next.js and Tailwind CSS to develop a styled, responsive, and fast-loading site
- Embedded a YouTube video demo of a capstone project to keep visitors engaged

## EDUCATION

**Fullstack Academy Web Development Bootcamp**

05/2022 - 09/2022

Software Engineering Certificate

Full-time, Full Stack Javascript Web Development Immersive
